Art Unit: 2822

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 1, after the title insert the following: - - This application is a divisional of U.S. Patent App. Serial No. 09/374,399, filed on 13 August 1999, now U.S. Pat. No. 6,625,787. - -

The following is an examiner's statement of reasons for allowance: None of the prior art teaches or suggests a method of converting a first network representation adapted for use in a programmable logic device into a second network representation, wherein the first network representation describes an input node connected to a first destination circuit via a first signal path and connected to a second destination circuit via a second signal path, including inserting a first macro in the first signal path, the first macro including a first delay-element representation and a first stopper-cell representation, inserting a second macro in the second signal path, the second macro including a second delay-element representation and a second stopper-cell representation, simulating a first signal traversing the first signal path and a second signal traversing the second signal path, logging a first simulated delay for signals traversing the first signal path, logging a second simulated delay for signals traversing

Art Unit: 2822

the second signal path, comparing the first and second simulated delays to find the difference between the first and second simulated delays, and substituting the first delay-element representation with a third delay-element representation to reduce the difference between the first and second simulated delays.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin M. Picardat whose telephone number is 571-272-1841. The examiner can normally be reached on Monday-Thursday 7:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amir Zarabian can be reached on 571-272-1852. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
